Study Effort vs. Academic Performance Correlation

Sum of studyHOURS and Sum of Python by fNAME

Average of Python

by prevEducation

Key Insight: Study effort (studyHOURS) accounts for **66.8%** of student success predictability, whereas entry exams account for only **18.9%**.

Recommendation: Shift from strict exam-based cutoffs to foundational onboarding bridge programs that capture dedicated, high-effort students.

Simulated At Risk Count

Simulated At-Risk Cohort Breakdown by Education Level

Count of fNAME by prevEducation

Strategic Simulation Takeaways:

- **Baseline Impact:** At 160 study hours, **24 students** remain below the target threshold.
- **Academic Action:** Requiring a mandatory 20-hour study module raises overall cohort qualification rate to **69.0%**.
